Will Rogers Remarks

BEVERLY HILLS, July 15. (To the Editor of The Times:)

Just flew in from Santa Barbara and found a real legitimate use for my pole field.

Speaking of aviation, I sure feel about this boy Carranza; I had flown with him in Mexico City.

I spoke English and he and I got very chummy down there; he was a fine aviator and a great young fellow.

Mexico will feel mighty proud of him and they had a right to be.

That's one of the sad things about it. There has been and will be lots of fine pilots lost in developing aviation to such a point that it will be safe for a lot of folks less useful to the world than these fine young fellows are.

All America grieves with Mexico, for boys like him belong to the world and not to one country.

Yours, WILL.

BLACK VOID BANISHED

Girl Blind Since Birth Can See

Eyes of Young Woman Show Her Wonders She Always Pictured Wrongly

MILWAUKEE, July 15. (Exclusive)—Marcella Calkins, blind since birth, today looked out on a world of wonders following an operation which has given her eyesight, and while she marveled at objects which she has been unable to imagine in her world of darkness, she awaited seeing her mother, whose image she had carried in her mind for twenty years since her birth.

"No one looks as I had expected them to look," Marcella explained, "and I'm afraid the picture I've carried of my mother all these years will be wrong."

Since her seventh birthday, Marcella has been a student at the Janesville (Wis.) School for the Blind. There she was taught the usual high-school subjects and in addition, she learned sewing, cooking, piano playing and what she regards as most important, stenography.

She once typed 130 words a minute when school officials entered her in a State contest.

Her eyesight slowly has been coming to her for the last few weeks, following a sixth operation, completing the delicate work a surgeon began several years ago.

Through the corner of one eye she had been able to distinguish between night and day, but now special lenses fitted to her eyes slowly are helping to develop her eyesight to normal.

Motion pictures, airplanes, flowers, sunsets, these are the things Marcella says she tried to vision and her first sight of some of these objects showed her that she was far ahead in her conception of them.

"It is impossible to realize the beauty of a flower by touch," she said. "And the faces of my friends aren't at all as I expected they would be. I have carried the same picture of my mother for so long as I can remember, and now I'm afraid that she, too, will not be at all what I have imagined her to be."

Marcella's family lives at Chelet, and as soon as she has recovered from her operation she is to see her mother and father for the first time. Then, she says she is going to get a job, for already she can type 130 words a minute, and she simply failed to start work at once.

INFANT FEW WEEKS OLD ON AIR RIDE

Hop Over Grand Canyon Saves Two-Day Trip on Train in Heat

GRAND CANYON (Ariz.) July 15. (Exclusive)—What is believed to be the youngest air passenger ever "carried" was a 7-week-old baby which was flown across the Grand Canyon from Fredonia, Ariz., to El Tovar Hotel on the south rim.

B. D. Lund, Harvey employee on the south rim, wished to bring his wife and baby, whom he had not seen for some time, to the hotel.

The heat at Fredonia, Cal., and the two-day hot railroad journey made him fearful that the baby would not stand the trip.

He arranged with Scenic Airways to fly across the canyon, pick up his wife and baby and return to the south rim at a cost of \$70, approximately one-half what the railroad and living expenses would have cost to get them around by any other form of transportation.

The trip over was made in fifteen minutes at Fredonia to pick up his wife and baby, and Lamar Nelson piloted the plane for Scenic Airways, Inc.

Radium Paint Inquiry Asked

NEW YORK, July 15. (AP)—The World tomorrow will say that Health Commissioner Harris has sent an appeal to Surgeon-General Cummings of the United States Public Health Service asking him to investigate use of so-called radium paint in industry.

Dr. Harris has discussed the situation with officers of the United States Radium Corporation and has been advised that it is the company's policy to sell luminous-paint mixture to a great many establishments throughout the country.

Thirteen women have lost their lives in the United States Radium Corporation's plant in Orange, N. J., through poisoning in which their mouths the brushes with which they painted the dials of watches.

DAWES HOST TO HOOVER

Candidate Visits at Evanston

Vice-President Sees Victory for Republican Nominee in Fall Election

CHICAGO, July 15. (AP)—Herbert Hoover, Republican candidate for President, arrived here on the Pennsylvania Railroad at 2:37 p.m. He is on his way to Brule, Wis., where he will discuss his resignation as Secretary of Commerce to President Coolidge.

A throng of thousands surged in to Union Station to greet the candidate, who posed for newspaper photographers and then left by auto for Evanston in the company of Vice-President Dawes and Mrs. Dawes.

After spending three hours here as the guest of Vice-President Dawes, he boarded his special train for the trip to the summer White House at the Brule, where he will spend two days with President Coolidge.

GREETED AT STATIONS

The Republican Presidential nominee had a pleasant overnight journey from Washington and was greeted along the lines by large crowds.

He made his first rear-platform talk during the forenoon at Port Wayne, Ind., where several hundred citizens greeted him. After the first cheers had died down, the candidate posed for pictures and then responded to demands for a speech.

This is no occasion for a political speech, Hoover said. He is here to see the country and to see the people.

Upon his arrival at Union Station here Hoover was met by the Vice-President, who accompanied him through the small room which could hardly accommodate a dozen men in which he manifested the first of his experiments with the world.

There also are standing in addition to Edison's, two-story experimental laboratory, a small machine shop, now vacant and crumbling into decay, and the old Edison home.

SOUTHERNER IN EAST HITS GOV. SMITH

Atlanta Pastor Attacks Catholics and Wets As He Turns Republican

NEW YORK, July 15. (AP)—Rev. John W. Ham, pastor of the Baptist Tabernacle of Atlanta, attacked Gov. Smith, Democratic Presidential nominee, in a sermon tonight at the first Baptist Church of New York City.

He said he wants to "open the eyes of the people of this city to the insidious propaganda of the New York newspapers, which are under the influence of the Roman Catholic Church and the liquor interests."

"The New York press," he said, "and about 85 per cent of the newspapers in America, dare not print this because they are under the influence of the Roman Catholic Church and they dare not speak against its terrible, unseen power; at the first who denies this is either ignorant or a falsifier."

Louisiana, he declared, is the only Southern State where the Democrats have a chance with Smith as the nominee.

"I have voted the Democratic ticket all my life," he said, "but now I am the hottest Republican you ever saw, and I represent the feeling of the South."

England Has Hot Weather

LONDON, July 15. (AP)—Great Britain's heat wave of the last few days reached its climax today when a temperature of 91 deg. in the shade was registered at Kew, near London. This was the highest temperature recorded in England in the last five years.

Many bathing accidents and heat prostrations were recorded.

Former Premier of Italy Worse

CAVOUR (Italy) July 15. (AP)—The condition of Giovanni Giolitti, former Premier of Italy, who is suffering from uremic poisoning, was reported to be worse tonight. His death is expected to be a question of only a short time.

Anticipation

—[From the Philadelphia Public Ledger.]

FORD WANTS EDISON TOWN

Negotiates for Purchase of Deserted Village Where Wizard First Starled World

NEW YORK, July 15. (Exclusive)—Henry Ford is negotiating for the purchase of Menlo Park, where half a century ago Thomas A. Edison first won the title of "the electrical wizard" with the inventions of the phonograph, the incandescent electric lamp and many other "wonders." It was learned tonight that Mr. Ford intends to make of the place a shrine to the man who revolutionized the world.

Edison, then an unknown youth in his twenties, established his first laboratory at Menlo Park in 1876. For eleven years, until in 1887, he moved to his present laboratory at Orange, N. J., he started the world with his experiments until Menlo Park became the Mecca for wondering thousands from all over the world.

Menlo Park now is a deserted village, but the buildings in which Edison labored are standing, including the small room which could hardly accommodate a dozen men in which he manifested the first of his experiments with the world.

MUSICIANS WARRING ON SOUND FILM

Unions Given Orders to Fight Use of Machines as Orchestra Substitutes

CHICAGO, July 15. (AP)—A fight against the increasing use of Vitaphones and Movietone machines has been started by the American Federation of Musicians and Chicago Federation of Musicians.

Joseph N. Weber, president of the national organization, in a communication sent today to the Chicago union, says that 200 theaters now are equipped with such machines and 1000 more are planning to install them.

He said he is not opposed to talking-pictures, because the union realizes the synchronization development is a genuine scientific achievement, but that if machines are used as a substitute for vocal and orchestral music they will "constitute a serious menace to cultural growth."

Unemployment among musicians has resulted in the ordering of all branches of the national organization to use every influence to stop use of the machines. The union has a membership of 158,000.

Woman Makes Mineral Find

THE PAS (Man.) July 15. (AP)—For the first time in the history of Northern Manitoba a woman has made a mineral discovery of major importance.

Miss Kathleen Rice, graduate of the University of Toronto, and well known by pioneer prospectors in the northern mining field, has made a rich strike, according to those who have examined the sample of copper pyrite brought from her claim.

The find was made near the northwest shore of Lake Wewak, on Rice Island about 1600 feet in length, twenty-five miles from St. James on the Hudson Bay Railway.

Hughes Talks With Seipel

VIENNA, July 15. (AP)—Former Secretary of State Charles Evans Hughes had a two-hour talk today with Chancellor Seipel, who discussed Austria's external problems, especially the difficult nature of her relations with Italy.

NEW BLAZE IN FOREST

Many Battle It During Night

Big Tujunga Canyon Flames Sweep on in Face of Determined Men

Santa Anita Fire Checked; Frazier Park Region Also Safe Now

Three forest fires raged in the Angeles and Santa Barbara National forests yesterday, but with nightfall and a lessening of the force of the high winds two of the blazes were brought under control, while the third, in Big Tujunga Canyon, twenty-five miles north of Pasadena, was running before a southwest breeze. Late last night it had burned over more than 100 acres and was baffling the efforts of 200 men to check the flames.

The fire which swept down the west side of Little Santa Anita Canyon, north of Sierra Madre, yesterday afternoon, was brought under control after desperate fighting. Seventy-five acres were burned. Close to 2000 acres of timber in Frazier Mountain Park were destroyed by a fire brought under control yesterday after more than twenty-four hours of strenuous fighting by a crew of 100 men recruited by the ranger in charge of the Tujunga division of the Santa Barbara National Forest.

FIRE GOING NORTHEAST

The Tujunga Canyon fire was discovered at 1:30 p.m. and is believed to have started from camp fires in some new mining claims on the south side of the Big Tujunga Canyon and near the mouth of Wildcat Creek, about four miles northwest of Colby's Ranch.

Reports from the scene of the fire late last night as given by Forest Supervisor Cecil, said the fire slowly is working its way northeast toward the Fine Flat Forest. This is a heavily wooded area of about 100 acres, which Pasadena expects to obtain as a public recreation ground. The fire is now about 100 acres, and ordered the fire fighters to exert every effort to stop the blaze in a sector which is almost devoid of brush and contains only a small amount of large timber.

This sector is some three miles southwest of the Fine Flat section.

MEN IN RESERVE

The forest lookout at Mt. Gleason informed the forestry officials last night that the best way was to bring the blaze down and that the flames slowly were losing their intensity.

The road between Mt. Wilson and Opita's Camp was ordered closed yesterday to all traffic in order to keep the way open for supplies and the rushing of additional men to the fire lines. Thirty or forty men were held in readiness to dispatch to the scene last night, but reports indicated, according to the forestry officials, that they would not be needed.

Early in the afternoon an airplane scout was sent out from Pasadena to make a survey of the forest. The plane turned back in attempting to make a landing at Ross Field. The pilot, Lieut. George Perry, however, escaped with only a few bruises when he was thrown out just after the plane touched the ground.

SECOND PLANE SENT

Lieut. Kelley, of the Western Air Express, then was engaged by the Forest Service and made an observation flight over the flaming forest. He gave much valuable information in directing the fight, according to Chief Dispatcher Davis, and the air report—the first of the season—allowed men to be moved to strategic points.

No cabins or mountain homes were in the path of the flames. The forestry officials expressed no fear for lives.

In the Santa Anita Canyon fire (Continued on Page 2, Column 3)

INFANT DEATHS DECREASE

Los Angeles Sixth Among Group of Large Cities, While Alameda Leads With 9 to 1000 Births

NEW YORK, July 15. (AP)—The infant mortality rate in cities of the United States during 1927 was lower than in any previous year, the American Child Health Association announced today in its annual report.

The rate last year was 64.4 deaths for each 1000 births, as compared with 73.7 in 1926 and 100 in 1918, the association announced. The report covers the 683 cities in the birth-registration area, embracing forty States that have satisfactory registration laws and record at least 90 per cent of the births.

The improvement in the infant death rate was almost universal over the country, said the announcement, "there being but few cities which failed to show a declining rate."

Alameda, Cal., had the lowest rate in the nation, with 9.0. Seattle had the lowest rate, forty-one, among cities of more than 250,000 population. Portland, Ore., and Minneapolis were second with forty-seven each. The figures for the country's ten largest cities were: New York and Cleveland, fifty-six; St. Louis fifty-seven; Chicago, sixty-three; Philadelphia, sixty-four; Los Angeles, sixty-seven; Detroit, seventy; Pittsburgh, seventy-two; Boston, seventy-six; and Baltimore, eighty-two. Figures are based on provisional reports from the Census Bureau, and from State and local officials.

In the group from 100,000 to 250,000 population, the largest cities—those of more than 25,000—had the lowest rate, 63.1. The smallest cities had a combined rate of 68.2.

A list of birth and news stands where the Airplane Edition of The Times may be purchased in San Francisco and Oakland appears on the last page of Part I.

A REAL VACATION SMILE!

The Kangaroo's Birthday

MEMBER THIS

human nature meek who earth will a lot of self control that way.

LORDS FIGHT INTERLOPERS

Uninvited Guests Mar Brilliancy of Two Balls Given by British Social Lights

LONDON, July 15. (Exclusive)—Mayfair's lords and ladies, who have been at war with each other for the last week over the grave social problem of "uninvited guests," got into worse straits yesterday when the aftermaths of two brilliant parties the night before were heard in a lowly police court.

The first concerned was Lady Beecham, wife of the famous orchestra conductor and formerly Miss Utica Welles of New York, whose ball at her mansion in Grosvenor Square Friday night was one of the chief social affairs of the season.

At 12:31 a.m. Ernest Brooks, who said he was late private photographer to the King, Queen and Prince of Wales, was ejected from Lady Beecham's home by a six-foot body. Brooks asserted that Lady Beecham invited him to take pictures.

There was considerable commotion among the bejeweled society queens until Brooks was arrested and hauled to jail, where yesterday he was fined \$10 for using insulting language.

Not far away at another brilliant gathering at the residence of

Lord and Lady Mountbatten, the King of Spain and the Duchess of York had their evening rudely interrupted shortly after midnight when five revolver shots were heard in quick succession. Policemen came running from every direction while the guests took to cover.

The mystery was cleared up in the police court yesterday when it developed that the shots were fired by night watchmen, who had discovered a couple of unemployed miners trying to force their way into the kitchen adjoining the house.

Meantime, Mayfair is full of talk about "uninvited guests," who this season seem to have outnumbered the invited guests at every large ball.

Suitable landing fields for ambulance airplanes are a problem that is gaining attention.

Fire Insurance Heavy in Mexico

MEXICO CITY, July 15. (Exclusive)—Fifty-two fire insurance companies are now doing business in Mexico, according to an announcement by the insurance division of the Department of Industry, Commerce and Labor. Of these companies twenty-six are British, nine German, six American, three French, two Mexican, and one each Canadian, Spanish, Dutch, Italian, Swiss and Danish.

The value of fire insurance in force in Mexico at the end of the year 1927 was \$33,582,690.02 (United States currency), which was an increase of \$27,039,907.39 for the year. The companies received renewals of \$98,688,906.64 during the year and wrote new business to the value of \$13,087,496.10. Premiums to the value of \$3,502,667.29 were received and fire loss claims totaling \$1,275,921.46 were paid.

BUILDING BOOMING
FAIRMONT (Minn.) July 15. (P)—New York isn't the only place where buildings are built and razed in rapid succession. On one Fairmont business site structures have been built and rebuilt five times in ten years.

GIANT AIRLINE PROPOSED

Veteran Flyer Would Link New York and Buenos Aires With 10,000-Mile System

Buenos Aires, July 15. (P)—Early inauguration of air-mail service between New York and Buenos Aires, with intermediate landings in Brazil and the Antilles, is predicted by Capt. Ralph O'Neill, former A.E.F. pilot representing United States aircraft interests.

Capt. O'Neill has been investigating routes and landing facilities. He reports that great interest centered in plans for the service wherever it was proposed.

"Our planes from the United States have a good chance of being adopted here," O'Neill said. "There is only one air-mail line now working, a French one from here to Brazil, thence by steamer to the African coast and planes again to Paris. It is a weekly service only."

"It now takes seven weeks to write to New York and get an answer, much longer than to Europe even by steamer. This is a handicap to business men, and I am sure an air-mail service would have more mail offered than it could take right from the first."

"Both the Brazilian and the Argentine navy officials like our planes, but the armies so far incline to the French models. The

CHINESE WANT CULTURE
SHANGHAI, July 15. (P)—Chinese educational authorities throughout that part of China controlled by the Nationalist government have petitioned the National authorities for a grant of \$500,000 to build a national library at Nanking, seat of the government.

Have you ever seen live bacteria?

See them through powerful microscopes and in motion pictures at the Food Preservation Show

917 West Seventh Street—at Figueroa

July 16 to 28—9 a.m. to 10 p.m. Daily

You know there are such things as bacteria which develop on improperly kept foods. But did you ever stop to think that they may be growing on the foods you serve in your home?

Unfortunately, it's a fact. The worst of it is you can't be sure, ordinarily, when foods are safe and when they're unfit for use. For if they're kept at refrigeration temperatures above 50 degrees, bacteria thrive for 36 hours before you can possibly detect them!

To show you how foods may be attacked by harmful germs, we've secured a most unusual exhibit. We show you various forms of food

deterioration, revealed by powerful microscopes. You can watch bacteria, taken from milk and other foods, actually moving! And we have a remarkable microscopic motion picture... a real "thriller" but not fiction... of living organisms which are magnified

57,000 times. Then we show you how modern refrigeration is a safeguard against this menace... how Frigidaire provides the low temperatures that keep foods fresh and wholesome at all times.

Don't miss this amazing exhibition. Nothing like it has ever been shown in this city. Come in any day between 9 a.m. and 10 p.m. Bring your friends along.

ONE OF ILLINOIS DIES

Large Known as Chimpion of
Prohibition, Farm Relief and Aviation

July 15. (AP)—Henry R. Rathbone of Kenilworth, Ill., died at 10:30 a. m. today in Presbyterian Hospital after a long illness. Rathbone, who was a candidate for re-election, had been ill since 1922, died in Presbyterian Hospital today.

"Captive" Cast
Seized in North

SAN FRANCISCO, July 15. (AP)—The entire cast of "The Captive," a play which was barred from Los Angeles recently, was arrested by police here last night under the law regulating plays asserted to be subversive to public morals.

The police made the arrests after the play was nearly over. All members of the cast were taken to the Hall of Justice, where bail was fixed at \$20 each. Two charges were filed, one under the State law, and the other under a city ordinance.

FARMS FOR SOLDIERS
MONTENAPOLIS, Italy, July 15. (AP)—Mussolini has decided to the war veterans' association 125 acres given him for creation of a model farm. The land will be tenanted by wounded veterans.

Co-operation
Group to Meet
in North Today

SAN FRANCISCO, July 15. (Exclusive)—Experts of the American Institute of Co-operation, representing more than 1,000,000 farmers in all parts of the United States, will open a two-weeks' session at the University of California tomorrow. The Berkeley meeting is a part of the organization's fourth annual conference, which opened last week in Southern California, and which is making for the first time a first-hand study of marketing organizations under actual operation.

"We realize there is no other place in the world where there is such a laboratory available for getting real information on co-operative marketing," said Charles W. Holman, executive secretary of the institute. "For that reason we brought the institute to California and the response has been splendid. We have a registration of more than 100 men and women, representing thirty states and six foreign countries."

Lloyd Tenny, former chief of the Bureau of Agricultural Economics, United States Department of Agriculture, will be the speaker at tomorrow's session.

HUSKINESS CUT OUT
HAVANA, July 15. (AP)—President Machado has just undergone a surgical operation on his voice. The huskiness for which the Cuban executive was famous was successfully eliminated. A minor operation removed a fine filament growth and gave the voice a clear tone. The delivery of an address has always been a painful procedure for President Machado.

BROTHERS SHOT IN QUARREL

One Killed and Another Wounded Following
Dispute Over Ownership of Woodpile

GALESBURG (Ill.) July 15. (AP)—A death drama with all the earmarks of a Kentucky feud was enacted at Cameron, ten miles southeast of here, today when Curtis G. Bates, farmer and township magistrate, shot and killed Chester Burnett, 36-year-old woodman, and seriously wounded his brother Clifford, 32.

The shooting followed a quarrel over ownership of a pile of wood left after railroad ties had been cut from it. The Burnetts leased the timber land from Bates and established a camp to cut the timber. Bates and the Burnetts both claimed the "slab," the remains from the tie-cutting operations, according to neighbors who witnessed the killing.

HOW OVER SLABS
Bates, accompanied by his three sons, went to the camp this morning to get a slab. Noticing a truck near the "slab" and inferring that the Burnetts meant to dispose of the wood, Bates told them they were to leave it alone until the law could decide. Don Starkey, a neighbor, said that Chester Burnett used abusive language toward Bates. Then he started toward the owner of the land with a club. Bates retreated, saying, "I'm going to get my gun and the Sheriff and then you watch out," according to Starkey's story.

He went home, called Sheriff Porter of Monmouth and with his gun went back to the timber. Returning from his home a mile away, he advanced toward the slab on either side of which the Burnetts stood.

KILLED INSTANTLY
He fired once at Chester, killing him instantly, witnesses said. The next bullet was directed at Clifford and struck him in the hip. Then

Mexican Killed
by Dry Agents

SANTA MARIA, July 15. (AP)—A gun battle between prohibition agents and two Mexicans declared to be bootleggers last night resulted in the death of Joe B. Billegas, 40 years of age, and the arrest of his companion, Isidro Gomez.

Twenty gallons of liquor and an automobile were confiscated by the officers, who declared Billegas and Gomez were members of a liquor ring flooding the central coast with smuggled-in whisky.

ITALIAN CONSCRIPTS LOYAL
BOLZANO (Italy) July 15. (AP)—Of more than 1300 young conscripts called for service this year only thirty-four failed to report, and some of these were excused.

PERFORMANCE

and

HOW!

"And How"—two words that Young America uses to describe the exceptional.

And we have used them to describe an exceptional car, the Victory.

It isn't what the Victory does, but HOW it does it.

Any car can climb a hill—but not like the Victory. Any car can travel a rutted road—but not like the Victory. Any car can start at the flash of green—but the Victory flashes into the lead.

Any other car can perform but not like the Victory because no other car is built just like the Victory.

That is the basic reason behind it all. And that is why we say—

"Performance AND HOW!"

First Photos Showing Roerich Expedition in Inhospitable Himalayas

HELD captive by hostile Tibetans in a mountain pass of the Himalayas 15,000 feet above sea level for a period of five months, the American expedition into the forbidden lands of interior Asia under the leadership of Prof. H. R. Roerich, has finally reached civilization in safety. Five native guides and ninety head of camels succumbed to the rigors of the altitude, but the white members of the party withstood ravages of hunger and reached civilization, haggard, ragged and emaciated. For more than a year nothing was heard from the party and it was generally believed that all had perished until Prof. Roerich led his followers out of the interior. Much of scientific value was obtained by the party. Photos reproduced below on this page are the first to reach the United States and are presented in the Southland exclusively through The Times. (P. & A. photos.)

OUR HISTORY IN PICTURES 1081

AFTER CAPTURING THE TOWN OF CALOOCAN, A FEW MILES NORTH OF MANILA, THE AMERICAN SOLDIERS OF GEN. MACARTHUR'S DIVISION AT ONCE SET TO WORK TO DIG INTRENCHMENTS. THIS WORK WAS ACCOMPLISHED UNDER A HEAVY FIRE FROM THE INSURGENT LINES BEFORE CALOOCAN AND AN ENFILADING FUSILLADE FROM MALABON.

THE RIFLEMEN IN THE LATTER PLACE WERE A CONSTANT SOURCE OF ANNOYANCE TO THE AMERICANS, BUT MALABON COULD NOT BE TAKEN EASILY, AS IT LAY ON AN ISLAND CONNECTED WITH THE MAINLAND BY A NARROW CAUSEWAY, AND AN ASSAULT WOULD COST MANY LIVES.

NO FURTHER ADVANCE WAS ATTEMPTED AT THE TIME AS MACARTHUR WAS INSTRUCTED TO WAIT UNTIL REINFORCEMENTS ARRIVED FROM THE UNITED STATES. DURING THIS PERIOD OF WAIT, THE RAILWAY FROM MANILA WAS REPAIRED, AND SOON A WHEEZY OLD LOCOMOTIVE WAS MAKING REGULAR TRIPS FROM THE CITY, HAULING CARLOADS OF RATIONS AND AMMUNITION.

WEEKS PASSED, BUT LIFE IN THE TRENCHES WAS FAR FROM DULL. THE SOLDIERS WERE PLentifully SUPPLIED WITH AMMUNITION AND USED IT UNRESTRICTEDLY. THE CALOOCAN POSURE OF ANY AMERICAN SOLDIER WAS THE SIGNAL FOR A STORM OF INSURGENT BARRAGE FROM THE FILIPINO LINES.

FRANKLIN

World's Fastest Road Car

FRANKLIN dashes
from Los Angeles to
New York and back
again in 6½ days!
SHATTERING RECORD
By 10½ HOURS...

FASTER than any other automobile—faster even than America's fastest limited trains—Cannon Ball Baker drove a Franklin stock sedan from Los Angeles to New York and return in 157 hours and 23 minutes. This sets an amazing new record for fast travel. It breaks the previous round-trip record by 10 hours and 36 minutes.

On the trip east, Cannon Ball Baker averaged 45.2 miles per hour, the fastest time ever made on wheels between Los Angeles and New York. He immediately started the return trip, the total distance registering 13 times longer than the annual Indianapolis automobile race. This record included all stops made on the entire round trip for food

and fuel. It scores a triumph over land comparable to Col. Lindbergh's triumph over sea. The air-cooled motor now rules the land as well as the air.

A New Type Performance

For more than 6½ days, this Franklin flashed through torrid deserts, up steep mountain sides, through hub-deep mud and over smooth paved roads. The road and weather conditions that Cannon Ball Baker met were both the worst and best that the average motorist encounters in a year's driving. Franklin conquered—and definitely proved that its superior performance and long distance comfort, make Franklin the world's fastest road car.

This remarkable performance is exclusively Franklin's. The Airman is easier to control than any other car you have ever known. "It is geared to the road," Baker says. The air-cooled motor is the only type of engine which can be driven indefinitely at sustained high speed without fear of over-heating, loss of power or injury to the motor. Franklin riding smooths all roads.

Incomparable New Luxury

And now the new Airman Limited, just introduced, stands not only as the fastest road car, but also the most luxurious. There is a new elegance and style in interiors which cannot be adequately described. These interiors are new in design, new in color, new

in application and new in appointments. They are modern, delightful, truly exquisite—comparable only to the beauty, comfort and artistry of American drawing rooms.

The exterior lines which have set the pattern for style and design for the entire motor world show new marks of distinction.

It will be three years—if ever—before manufacturers will be able to even approach the elegance of the new Airman Limited. They will never be able to duplicate the remarkable performance of the Airman Limited—without air-cooling.

An absolutely new and thrilling motor experience awaits every driver of the new Airman Limited.

CHUCKLES from LIFE

Doesn't Travel Broaden One?
We're all going abroad again this summer. Isn't it thrilling? There's really nothing like travel to broaden one, is there? My, how we did have the laugh on poor old Europe last summer! I'll never forget it. We had the luck to be in Paris when the franc was at its lowest, and you should have seen their faces when we began giving five-and-ten-franc tips to taximen and chambermaids. They all thought we must be millionaires. Paris wouldn't be a bad town if it weren't so immoral, but at that it's jazziest than London. There's a burg for you. Rains every day and you positively have to hunt for ice with your drinks. And I thought I'd die at the way the women dress. Mother and sis used to buzz right out in their faces. Couldn't help it, positively. And when we went to Italy I used to call the waiters vops, and you should have seen the black looks they gave me. Gee! These Europeans have no humor, have they? Guess they're pretty glad to get our money, though, now they're all nearly down and out. And at that I'm sort of pleased to be sailing again, as I don't think there's anything in the world that broadens one like travel—do you?

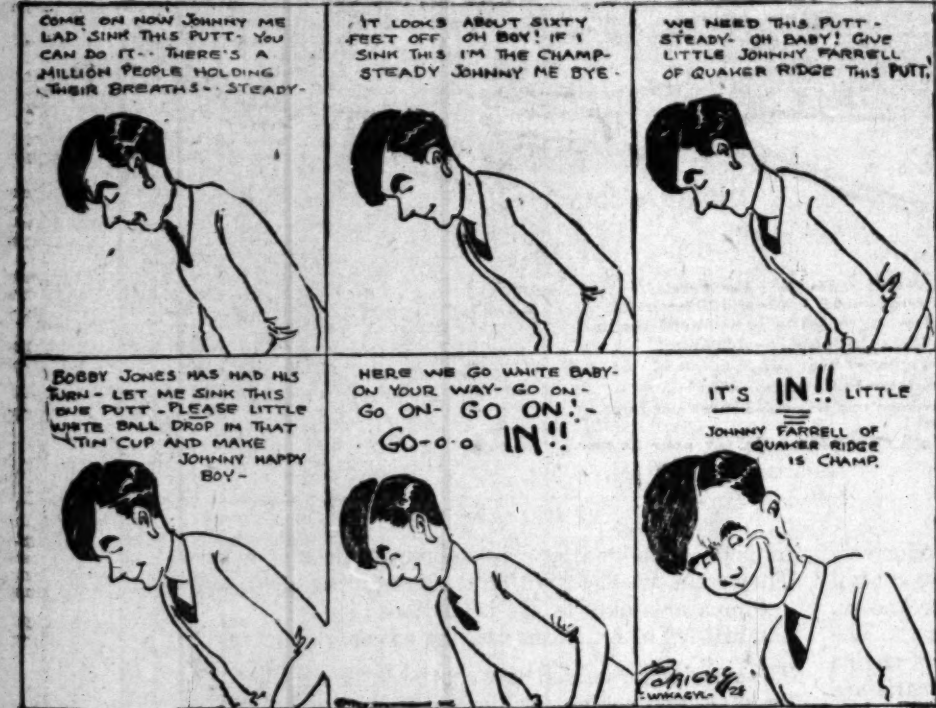

PERCY WAXMAN.

Intelligence Test

1. Who said what when who asked him why he cut down what?
2. What is it that who would walk how far to get?
3. Why is who called "Hell and Maria" what?
4. Who shot what off whose head?
5. How long does what stay where if he sees his shadow when?
6. What happened after who marched how many times around what and blew what?
7. How many whate if laid end to end would reach from where to what place?
8. Where was who when what went out?
9. Who said who would fight it out in what way if it took how long?
10. Why do intelligent people waste time on so-called "Intelligence Tests"?

Chalmerich

Hits Pair

of Homers

BY BOB RAY

Cunningham and Harry Tunningham, the former a near veteran and the latter just a rookie, pitched Marty Krug's revived Angels to a couple of victories over the Oakland Oaks yesterday's twin bill at Wrigley Field.

In case you're one of those who demand statistics, the Angels won by scores of 7 to 1, and 8 to 1, and it was the pitching of the Cherrubus that made the triumph possible.

Chalmerich blanked the Oaks in the open and then made a decidedly unnecessary run in the ninth inning, while Chasley, a youngster who flattered over to Krug's house to see if he had a job last week, gave the team his first hit in the seventh inning. Although Chalmerich was wild and walked nine men, he did not have a hit in the eighth or ninth.

Chalmerich practically brought down the cheering of Wilbur Cooper, who was in the open when he was hit in the eighth.

DEMPSEY OFF FOR

PORTERS AND MANUFA

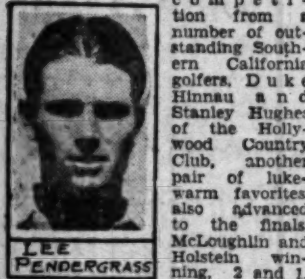

McLoughlin and Holstein, Jr.,

HUGHES, HINNAU LOSE TO BEL AIR STARS, 2 AND 1

Martin, Stover Upset by Hollywood Pair, 4 and 3; Former Tennis Ace Shines in Victory

BY EDWARD LAWRENCE

"Once a champion, always a champion," appears to fit exceptionally well the broad shoulders of Maury McLoughlin, one of the great tennis players of all time, who yesterday won the best-ball foursome invitational tournament at Girard with a fellow teammate of the Bel Air Country Club, George M. Holstein, Jr.

McLoughlin

Not figured as a championship prospect, the Bel Air team played consistently in the face of strong competition from a number of outstanding Southern California golfers. D. K. Hinnau and Stanley Hughes of the Hollywood Country Club, another pair of future farm favorites, also advanced to the finals.

McLoughlin and Holstein, Jr. won the tournament, 2 and 1, after a string of matches over the tricky Girard course.

The tournament was a decided failure from the favorite's point of view. Maury McLoughlin and Lee Pendergrass of Wilshire, both playing very fine golf and figured to get into finals, lost out in the semifinals to McLoughlin and Holstein, Jr. at 1 and 0.

McLoughlin and Holstein turned in an impressive record. In the first round they defeated Jack Mackay and Jimmy Holland, Los Angeles Country Club youngsters, 1 up, Jimmy Holland and W. L. (Bill) Wolfe, El Cerrillo's strong team, fell in the second round, 4 and 3.

Ben Kerr and E. E. Jones of the La Brea Country Club, Santa Barbara, won the first-flight title from Clark Sommers and M. C. Sommers of the Los Angeles Country Club.

PARADENA, JONATHAN GOLFER TIE

Partridge was the scene of an interesting tournament Wednesday when the Jonathan Club battled to a draw with the Pasadena Athletic and Country Club.

Play was in four strokes. The Jonathan Club team held a 1-point advantage to the last minute, when the Pasadena golfers won the final match to knot the count.

Fred Morrison of Midwick and Olin Dutra of Brentwood were invited to play. Joe Hegeman and Morrison represented the Jonathan Club, while A. K. Bourne played with Dutra under the Pasadena banner. That match also ended in a draw. Hegeman won in 33 and home in 37 for a fine 70. Dutra had a 71, Morrison a 74, and Bourne an 80.

Prize awards were as follows: Hegeman won the sweepstakes award for the best low gross score of the day. First low net prize in Class A, comprising players from scratch to 8, went to C. E. Foster of Jonathan, 71-3-58. Second low net was won by W. E. Taverner of Pasadena with a net score of 72. Olney Beck won first low net in Class B, 9 to 18 handicap, 79-10-69.

Memor. Anton and Adams of the Jonathan Club for second low net with 71 1/2. In Class C, the first low net prize was won by E. J. Bowen, Jonathan, with a 68. J. E. Town send was second with a 70.

SWEEPSTAKES FEATURE AT EL CERRILLO

H. Winters, 83-16-67, won the sweepstakes at the El Cerrillo Country Club yesterday. Bob Robinson, 75-6-59, took second, and G. S. Ramsey, 86-14-72, was third. Other results: O. Ross, 83-10-79; Clarence Shockley, 82-8-74; and Aubrey Devine, 82-6-78.

Saturday's results were as follows: John Campbell, 84-14-70; Clarence Shockley, 79-8-71; H. A. Decker, 83-13-71; and Aubrey Devine, 78-7-72.

DUDLEY FAVORED IN "PRO" SWEEPSTAKES

Ed Dudley, Southern California professional golf champion, will be favored in the "pro" sweepstakes at Santa Monica today. A number of well-known local pros are expected to compete.

RANCHO GOLFERS SIGN FOR TEAM MATCH

With fifty-three golfers already signed up, the Rancho Country Club expects to have a strong team for the coming Lakeside vs. Rancho match Saturday when 100 members of Rancho battle an equal number of Lakeside golfers. The match will be played at Lakeside.

NEW FOX HILLS COURSE TO BE OPENED SOON

The second eighteen-hole course at Fox Hills will be open for play within the next two months according to A. A. Comey, Fox Hills president.

Chick Fraser, Fox Hills "pro," is enjoying considerable success with

Black Maria II Cops Thrilling 'Kicker' Races

LONG BEACH, July 15.—In spectacular hydro races at Alamitos Bay today Al Thompson of Los Angeles, driving his Black Maria II, romped to victory in five heats, piling up enough points to clinch the big sterling silver Pacific Southwest Exposition trophy. During the thrilling races nine boats turned over or crashed, seven sinking.

Black Maria II crashed into Heah Ah Go at the first turn in the opening heat, Thompson driving the remainder of the race with a hole in his boat, which he partly plugged up with the life preserver. Following this event Thompson was able to temporarily patch his Black Maria II and by spectacular driving hold first place for the remainder of the day's races.

The races were staged as Southern California Yacht Association regatta to the regatta of the international speed-boat races scheduled in connection with the Pacific Southwest Exposition, opening in Long Beach August 4 to 12, and the Pacific Southwest Exposition, opening in Long Beach August 4 to 12, and the Pacific Southwest Exposition, opening in Long Beach August 4 to 12.

STAUBER TOPS TRAPSHOOT

Leads Large Field at Los Angeles Gun Club With Perfect Target Score

A. J. Stauber with a score of 100 out of 100 led the faithful bunch at the Los Angeles traps yesterday in the century shoot.

He also broke 25 straight in practice before the program started, which with an unbroken run of 381 continued from the State shoot given him 506 out of 507 shot at to date. Guy Houghtaling and Lou Reed finished in a tie for second honors with 98 each.

H. E. Sargent and Jack Light cracked 96 each; Don Morrison, 95; Goodrich, 94; Ben Dear, 93 and Jack Light, 92.

In the handicap event Houghtaling won from 22 yards with 48x50; Reidenbaugh, Glass and Ward were the runners-up with 45 each, from 20 yards.

The trophy winners were Stauber, Houghtaling, Light and Slater. A registered shoot will be held next Sunday. The results:

CORNICA AND PERRETT WIN IN MOVIE NET TOURNAMENT

Two of the four seeded favorites won first-round matches in the third annual motion-picture tennis tournament at the Palomar Tennis Club yesterday. Martin Cornica, the defending champion, and Francis Perrett, red-headed publicist vendor, both seeded, advanced to the second round. Bob Leonard and Ted Don Eitz, the other two favorites, drew dyes in the opening round.

Cornica triumphed easily over John Bucquet, 6-0, 6-0. Perrett had a terrible time beating Ralph Neil, 6-3, 3-6, 6-4.

Ed Gelsey played the only other tough match of the day, beating Wilson NINE WINS GAME

Fifteenth game: Portland 5, Missions 4.

Sixteenth game: Portland 5, Missions 4.

Seventeenth game: Portland 5, Missions 4.

HOWARD PLOESSEL SETS NEW BACKSTROKE

BY OLIVE HATCH

Shattering a Southern California mark at 220 yards backstroke, Howard Ploessel, swimming unattached, featured the new Lake Norconah Club yesterday afternoon. Ploessel broke the former mark of 2:10, which was held by George Harris of the Hollywood Athletic Club, by fully 10 seconds, covering the distance in 2m. 11.2-55. Harris' mark of 2m. 12. was set only a few months ago at the Elks' Club.

Katherine Walton, diminutive new sprint prospect on the L.A.C. women's team, won the girls' 100-yard freestyle race from Laura Moore of the same club, in 24.1-56. Betty Kelsey of the San Clemente Club, placed third. A host of young swimmers entered this event. Miss Walton not only won the junior race, but placed third in the women's 100-yard free style, nosing out Laura Moore.

The men's ten-foot spring-board diving competition was won by Stanley Klister of the Los Angeles Athletic Club, while Johnny Kelly, brother of the famous Mickey, won second place for the same club. Wayne Buttress of the Ambassador S.A.C. won third place from a field of entrants.

A very unique diving exhibition was given by both the men and women divers from the eighteen, twenty-four and thirty-two foot platforms. Six divers left all three towers in unison, each doing different dives. The platform divers included Misses Bobby Koshade, Winnie Hayman and Marion Dale of the L.A.C., and such men divers as those who won the ten-foot springboard event.

Two San Clemente Club girls stars won the women's races, with Marjorie Lowe first in the 100-yard free style, and Kathryn Ulrich, medal winner of the 100-yard backstroke event.

Results follow:

220 yards backstroke, men— Won by Howard Ploessel, unattached, 2:11.2-55. Second, H.A.C. second, Walter Davis, unattached, 2:21. Third, J. C. Goss, Southern California record, 2:31. Won by Katherine Walton, L.A.C.; Laura Moore.

100 yards freestyle, girls— Won by Betty Kelsey, San Clemente Club, 24.1-56. Second, Laura Moore, same club, 25.1-56. Third, Miss Walton, same club, 26.1-56.

100 yards free style, women— Won by Marjorie Lowe, same club, 2:10. Second, Kathryn Ulrich, same club, 2:20. Third, Miss Walton, same club, 2:30.

100 yards backstroke, women— Won by Kathryn Ulrich, same club, 2:20. Second, Miss Walton, same club, 2:30. Third, Laura Moore, same club, 2:40.

100 yards freestyle, men— Won by Stanley Klister, Los Angeles Athletic Club, 2:10. Second, Johnny Kelly, same club, 2:20. Third, Wayne Buttress, Ambassador S.A.C., 2:30.

100 yards backstroke, men— Won by Stanley Klister, Los Angeles Athletic Club, 2:10. Second, Johnny Kelly, same club, 2:20. Third, Wayne Buttress, Ambassador S.A.C., 2:30.

100 yards freestyle, men— Won by Stanley Klister, Los Angeles Athletic Club, 2:10. Second, Johnny Kelly, same club, 2:20. Third, Wayne Buttress, Ambassador S.A.C., 2:30.

100 yards backstroke, men— Won by Stanley Klister, Los Angeles Athletic Club, 2:10. Second, Johnny Kelly, same club, 2:20. Third, Wayne Buttress, Ambassador S.A.C., 2:30.

100 yards freestyle, men— Won by Stanley Klister, Los Angeles Athletic Club, 2:10. Second, Johnny Kelly, same club, 2:20. Third, Wayne Buttress, Ambassador S.A.C., 2:30.

100 yards backstroke, men— Won by Stanley Klister, Los Angeles Athletic Club, 2:10. Second, Johnny Kelly, same club, 2:20. Third, Wayne Buttress, Ambassador S.A.C., 2:30.

100 yards freestyle, men— Won by Stanley Klister, Los Angeles Athletic Club, 2:10. Second, Johnny Kelly, same club, 2:20. Third, Wayne Buttress, Ambassador S.A.C., 2:30.

PROSPECTS AT FOSTER MINE ROSY

Engineer Reports New Work Discloses Large Tonnage of High Grade

Returning from a visit to Shadow Mountain in San Bernardino county, E. D. Foster of this city, consulting engineer and geologist, and trustee for Foster Mines, states that work performed in the development of the company's property has resulted in the uncovering of a large tonnage of high-grade copper-gold ore.

Until recently, he says, the property was considered a mammoth low-grade schist copper property, but that now the presence of considerable high grade indicates that the property is a high-grade copper-gold mine.

In mine development a long tunnel has been started to block out additional ore tonnage. During the past few months, Mr. Foster says, a truck road has been built to connect with the tunnel portal and this, unexpectedly, has uncovered commercial ore for a distance of several hundred feet, which includes occurrences of high-grade black copper.

These disclosures, he states, virtually prove the existence of 500,000 tons of workable ore in the mountain area, which can be handled by steam shovel or caving methods, making it possible to produce copper at a cost per ton less than at some of the big copper producers of the Southwest.

MARK SET BY OIL TRAFFIC

Fifty Tankers Load and Leave Port During Week; Shipment Total Near Record

Southern California reached her highest mark last week for the standpoint of the number of oil tankers loaded and cleared in seven days. Fifty tankers came in and loaded and moved out during the week, taking with them the largest quantity of petroleum products ever moved out of this harbor in one week with a single exception and that was more than three years ago. Last week's movement of petroleum products totaled 3,035,855 barrels. Ten of these tankers went to the Orient.

The shipments were headed by gasoline, which amounted to 950,000 barrels. Crude was second with 855,567 barrels, and fuel oil was third with 809,893 barrels. Diesel oil shipments amounted to 134,595 barrels and the kerosene movement ran up to 96,700 barrels.

The Pacific domestic trade took 1,189,380 barrels, including 601,198 barrels of crude, 303,346 barrels of fuel and 284,836 barrels of gas. The Pacific foreign trade took 738,900 barrels, including 109,139 barrels of crude, 533,007 barrels of fuel and 96,700 barrels of kerosene.

The Atlantic domestic trade took 672,000 barrels, including 245,195 barrels of crude, 551,244 barrels of gas and 75,688 barrels of Diesel. The Atlantic foreign trade took 255,477 barrels, embracing 56,540 barrels of fuel, 120,000 barrels of gas and 58,937 barrels of Diesel. The shipments for the week were listed as follows:

GETTY GETS HOLDINGS IN LERDO MESA

Drilling Agreement on 4000 Acres of A. Mattei Reported at Bakersfield

BAKERSFIELD, July 15. (Exclusive)—The George F. Getty organization is reported to have obtained the first drilling agreement on the 4000-acre Lerdo Mesa holdings of A. Mattei of Fresno. It was revealed this week in preliminary arrangements for drilling on Sec. 24, 26, 28, 30, 32, 34, 36, 38, 40, 42, 44, 46, 48, 50, 52, 54, 56, 58, 60, 62, 64, 66, 68, 70, 72, 74, 76, 78, 80, 82, 84, 86, 88, 90, 92, 94, 96, 98, 100, 102, 104, 106, 108, 110, 112, 114, 116, 118, 120, 122, 124, 126, 128, 130, 132, 134, 136, 138, 140, 142, 144, 146, 148, 150, 152, 154, 156, 158, 160, 162, 164, 166, 168, 170, 172, 174, 176, 178, 180, 182, 184, 186, 188, 190, 192, 194, 196, 198, 200, 202, 204, 206, 208, 210, 212, 214, 216, 218, 220, 222, 224, 226, 228, 230, 232, 234, 236, 238, 240, 242, 244, 246, 248, 250, 252, 254, 256, 258, 260, 262, 264, 266, 268, 270, 272, 274, 276, 278, 280, 282, 284, 286, 288, 290, 292, 294, 296, 298, 300, 302, 304, 306, 308, 310, 312, 314, 316, 318, 320, 322, 324, 326, 328, 330, 332, 334, 336, 338, 340, 342, 344, 346, 348, 350, 352, 354, 356, 358, 360, 362, 364, 366, 368, 370, 372, 374, 376, 378, 380, 382, 384, 386, 388, 390, 392, 394, 396, 398, 400, 402, 404, 406, 408, 410, 412, 414, 416, 418, 420, 422, 424, 426, 428, 430, 432, 434, 436, 438, 440, 442, 444, 446, 448, 450, 452, 454, 456, 458, 460, 462, 464, 466, 468, 470, 472, 474, 476, 478, 480, 482, 484, 486, 488, 490, 492, 494, 496, 498, 500, 502, 504, 506, 508, 510, 512, 514, 516, 518, 520, 522, 524, 526, 528, 530, 532, 534, 536, 538, 540, 542, 544, 546, 548, 550, 552, 554, 556, 558, 560, 562, 564, 566, 568, 570, 572, 574, 576, 578, 580, 582, 584, 586, 588, 590, 592, 594, 596, 598, 600, 602, 604, 606, 608, 610, 612, 614, 616, 618, 620, 622, 624, 626, 628, 630, 632, 634, 636, 638, 640, 642, 644, 646, 648, 650, 652, 654, 656, 658, 660, 662, 664, 666, 668, 670, 672, 674, 676, 678, 680, 682, 684, 686, 688, 690, 692, 694, 696, 698, 700, 702, 704, 706, 708, 710, 712, 714, 716, 718, 720, 722, 724, 726, 728, 730, 732, 734, 736, 738, 740, 742, 744, 746, 748, 750, 752, 754, 756, 758, 760, 762, 764, 766, 768, 770, 772, 774, 776, 778, 780, 782, 784, 786, 788, 790, 792, 794, 796, 798, 800, 802, 804, 806, 808, 810, 812, 814, 816, 818, 820, 822, 824, 826, 828, 830, 832, 834, 836, 838, 840, 842, 844, 846, 848, 850, 852, 854, 856, 858, 860, 862, 864, 866, 868, 870, 872, 874, 876, 878, 880, 882, 884, 886, 888, 890, 892, 894, 896, 898, 900, 902, 904, 906, 908, 910, 912, 914, 916, 918, 920, 922, 924, 926, 928, 930, 932, 934, 936, 938, 940, 942, 944, 946, 948, 950, 952, 954, 956, 958, 960, 962, 964, 966, 968, 970, 972, 974, 976, 978, 980, 982, 984, 986, 988, 990, 992, 994, 996, 998, 1000, 1002, 1004, 1006, 1008, 1010, 1012, 1014, 1016, 1018, 1020, 1022, 1024, 1026, 1028, 1030, 1032, 1034, 1036, 1038, 1040, 1042, 1044, 1046, 1048, 1050, 1052, 1054, 1056, 1058, 1060, 1062, 1064, 1066, 1068, 1070, 1072, 1074, 1076, 1078, 1080, 1082, 1084, 1086, 1088, 1090, 1092, 1094, 1096, 1098, 1100, 1102, 1104, 1106, 1108, 1110, 1112, 1114, 1116, 1118, 1120, 1122, 1124, 1126, 1128, 1130, 1132, 1134, 1136, 1138, 1140, 1142, 1144, 1146, 1148, 1150, 1152, 1154, 1156, 1158, 1160, 1162, 1164, 1166, 1168, 1170, 1172, 1174, 1176, 1178, 1180, 1182, 1184, 1186, 1188, 1190, 1192, 1194, 1196, 1198, 1200, 1202, 1204, 1206, 1208, 1210, 1212, 1214, 1216, 1218, 1220, 1222, 1224, 1226, 1228, 1230, 1232, 1234, 1236, 1238, 1240, 1242, 1244, 1246, 1248, 1250, 1252, 1254, 1256, 1258, 1260, 1262, 1264, 1266, 1268, 1270, 1272, 1274, 1276, 1278, 1280, 1282, 1284, 1286, 1288, 1290, 1292, 1294, 1296, 1298, 1300, 1302, 1304, 1306, 1308, 1310, 1312, 1314, 1316, 1318, 1320, 1322, 1324, 1326, 1328, 1330, 1332, 1334, 1336, 1338, 1340, 1342, 1344, 1346, 1348, 1350, 1352, 1354, 1356, 1358, 1360, 1362, 1364, 1366, 1368, 1370, 1372, 1374, 1376, 1378, 1380, 1382, 1384, 1386, 1388, 1390, 1392, 1394, 1396, 1398, 1400, 1402, 1404, 1406, 1408, 1410, 1412, 1414, 1416, 1418, 1420, 1422, 1424, 1426, 1428, 1430, 1432, 1434, 1436, 1438, 1440, 1442, 1444, 1446, 1448, 1450, 1452, 1454, 1456, 1458, 1460, 1462, 1464, 1466, 1468, 1470, 1472, 1474, 1476, 1478, 1480, 1482, 1484, 1486, 1488, 1490, 1492, 1494, 1496, 1498, 1500, 1502, 1504, 1506, 1508, 1510, 1512, 1514, 1516, 1518, 1520, 1522, 1524, 1526, 1528, 1530, 1532, 1534, 1536, 1538, 1540, 1542, 1544, 1546, 1548, 1550, 1552, 1554, 1556, 1558, 1560, 1562, 1564, 1566, 1568, 1570, 1572, 1574, 1576, 1578, 1580, 1582, 1584, 1586, 1588, 1590, 1592, 1594, 1596, 1598, 1600, 1602, 1604, 1606, 1608, 1610, 1612, 1614, 1616, 1618, 1620, 1622, 1624, 1626, 1628, 1630, 1632, 1634, 1636, 1638, 1640, 1642, 1644, 1646, 1648, 1650, 1652, 1654, 1656, 1658, 1660, 1662, 1664, 1666, 1668, 1670, 1672, 1674, 1676, 1678, 1680, 1682, 1684, 1686, 1688, 1690, 1692, 1694, 1696, 1698, 1700, 1702, 1704, 1706, 1708, 1710, 1712, 1714, 1716, 1718, 1720, 1722, 1724, 1726, 1728, 1730, 1732, 1734, 1736, 1738, 1740, 1742, 1744, 1746, 1748, 1750, 1752, 1754, 1756, 1758, 1760, 1762, 1764, 1766, 1768, 1770, 1772, 1

Mine and Oil News

LAWDALE MAY NOW PRODUCE

San Clemente Company
Getting Small Flow
Other Large Corporations
Hold Acreage Blocks

Field Believed on Edge of
Petroleum Structure

All indications point to the probable discovery of an oil field near Lawdale. It has been the subject of wildcatting and exploration by large and small companies for the last five years. The San Clemente Oil Company, according to company reports, is getting from 200 to 250 barrels a day of good oil, testing about 33 deg. gravity, from a depth of about 5000 feet.

The well is said to be flowing to the pump, and pumping from the pump to the tanks, from which the oil is hauled in trucks to the Vernon Refining Company's plant. It is understood that the Smith Petroleum Company, which drilled a well in the same area to about 6000 feet last year but which has been idle for several months, is planning to plug back its old well, and try for production in the same zone as the San Clemente project. The Smith well is reported as being in poor mechanical condition, and there is some doubt as to whether it is mechanically possible to make a producer out of it.

The Smith brothers, and the San Clemente Oil Company together control several hundred acres of the Lawdale structure. Besides these companies, it is understood that the Shell company, and Standard Oil, hold blocks ranging around fifty acres.

The general impression in the oil industry is that the San Clemente well, while perhaps not entitled to be rated as a commercial producer, considering its depth and production, nevertheless has definitely settled the status of Lawdale as an oil-bearing district. With this fairly established fact, it is considered probable that other wells drilled in the field in the near future, so that a few months should definitely determine how much of a field Lawdale may be expected to be. It is the opinion of a number of experienced oil men that the San Clemente well is perhaps on the edge of a structure but that the real field lies a mile or more to one side, in or near what is known as Redondo Villa.

PROJECT PROMISING

Chandler-Candfield Midway Well
Cores 110 Feet of Sand

BAKERSFIELD, July 15. (Exclusive)—In the Midway field, the Chandler-Candfield Midway Oil Company's No. 4, on Sec. 7, 32-23, looks promising. The company has cored 110 feet of oil sand, according to reports, and drilling now proceeding at 2772 feet with good oil sand.

In the Midway, Poco Creek and Round Mountain fields, four new wells have been started. Of the new wells the Lindsay Oil Company is starting one at Round Mountain No. 1, on Sec. 6, 28-23, while the Poco Creek district the Signal Gasoline Company has installed its equipment on Sec. 27, 27-23. The Richfield Oil Company will drill on Sec. 6, 32-23, and the Honolulu Consolidated on Sec. 6, 32-24, both of these wells being in the Midway field.

MAPPING FROM THE AIR
Indication of the useful work the Army Air Force is doing is the report of a flight made over Florida for the purpose of remapping the country through aerial photographs. Altogether 3000 miles of country have been photographed in a flying time of sixty-five hours and in one flight above the Everglades pictures were taken from a height of 2000 feet.

The pictures are now being made up and it is said that when they have been assembled the map of Florida will have been considerably changed. Rivers were found where none were known to exist and bays were discovered to be four times as large as they appear on present maps.

It is hoped that the new maps will aid materially in the reclamation of the swampy Everglades, which are now used as a refuge for lawbreakers. During the same flight the coast line between the town of Everglades on the west coast to Flagler Beach on the east coast was photographed for the Coast and Geodetic Survey—New York Times.

CHRIST IN INDIA
The tendency of Hinduism says Sir Arthur Gapp in the London Telegraph has been to absorb other religions, and many Hindus are actually asking if it is not possible to practice their own faith—at any rate in certain of its aspects—and combine with the service of Christ.

Be that as it may Hinduism is very tolerant in its attitude toward Christianity, and there is widespread reverence for the work, character and person of Jesus Christ. This is attributable, I think, largely to the influence of Gandhi.

Cinema films illustrating the life of Christ have drawn crowded audiences, and, largely through the agency of the British and Foreign Bible Society, copies of the Bible and of the New Testament are being circulated in large numbers. Occasionally Hindu papers publish long selections from the Scriptures.

ANGELENOS TAKE OVER OLD ESTATE

Golden Center on Site of
Grass Valley to be Worked
Under Bond

SACRAMENTO, July 15. (Exclusive)—The Golden Center mine, located in the residence section of Grass Valley, has been taken under bond and option by L. S. Winshaw, manager for the Cooley Butler interests of Los Angeles. It is reported here that the Golden Center will be consolidated with the Alta Hill and other groups controlled by the Butler syndicate, and the consolidated holdings worked from the deep shaft proposed for the Alta Hill. The Golden Center is developed to an incline depth of 1100 feet and for several years yielded a large amount of rich ore.

The Cooley Butler Development Company, controlled by Southern Californians, has reopened the old Baker shaft property after forty years of idleness. A lower tunnel is said to have tapped the main ledge, disclosing a strong shoot of rich ore. The mine is located on the placer country extension of the Mother Lode, and was long noted for its yield of high grade ore.

Dredging is to be resumed shortly in the Oroville field by the Shasta-Rutte Gold Dredging Company. The management states that sufficient ground has been secured in the Thermalito section to keep the dredge operating steadily for seven years, with comprehensive tests indicating satisfactory gold values. Dredging was discontinued at Oroville about a year ago. In the palmy days of the industry more than thirty gold dredgers operated in the Oroville district, the birthplace of modern gold-dredging.

Development of the Halcyon Grave placer holdings, seven miles from Camptonville, Yuba county, is being pressed by the H. F. McLaughlin Company of Los Angeles. Gravel carrying good gold averages 100 to 150 dollars a ton, and is reported as having been exposed in old workings, but the company is centering work on driving a lower tunnel, designed to tap the main channel at depth. Most of the placer is virgin, but the channel yielded rich values in the early days of the California gold rush.

COPPER ORE STRIKE HELD IMPORTANT

Find in Old Dominion's
Deep Workings Regarded
Highly Interesting

GLOBE (Ariz.) July 15. (Exclusive)—Discovery of a narrow vein of copper sulphide on the 2600-foot level of Old Dominion is declared to be of very large importance, with probability of leading to new mines of smelting ore. The material is a chalcocite, running about 3 per cent copper, and is paralleling the Old Dominion vein at a distance of 700 feet.

This vein, which was manager F. W. Hoar, who was manager of the property twenty-two years ago, tells of the discovery then of a similar vein on the 1200-foot level, less than a mile from the sulphides ever known in the mine. Therefore all sulphides for smelting fluxes had to be brought from other sections, from Rhodes and California, with some ore from the Rhodes mine, beyond Miami. A couple of years later an ample ore supply was available for a new smelting plant, equipped for sulphides, with converters.

Down to 1200 feet, the ore is a free smelting oxide, or carbonate. The narrow seam of 1002 widened to even thirty feet, of ore of good smelting grade. Drifting on the new lead is slow, for a heavy flow of water has been struck, and the air temperature is up to 110 deg.

THE FIRST HOUSES
Workmen excavating near Lake Zurich have unearthed remains of lake dwellings which date back to the prehistoric period, more than 7000 years ago. Stone axes, spears and domestic utensils are among the objects found.

The Swiss lake dwellings were revealed to the world in 1853 by a great drought, when waters in the lakes and rivers of the country fell many feet below normal level. The structures, which supported the wooden platforms on which the dwellings were built are made of strong piles of tree trunks driven in to the bottom of the lake.

A combination of clay and wood was used in the construction of the lake huts, and the doors of the huts which were about 10 feet high were made of large slabs of stone bearing inscriptions of the Stone Age in hieroglyphs—(London Times).

World Would Stop Without Rubber
The modern world cannot live without rubber. In a rubberless world motor transport would be at a discount, for one thing, and many other industries would be seriously handicapped.

Only a 100 years ago manufacturing rubber was practically unknown. In 1819 Thomas Hancock began what is now the great rubber business, and a little back shop in Goswell Mews, London. The rubber industry has since grown to a world-wide enterprise, and the time by the investigations and discoveries of Macintosh and Good-year.

GAS IN FOSTER WELL PUZZLES

Content Reported Unusual
for Ventura Field

Situation Raises Question of
Separate Structure

Oil men interested in the activities of the Ventura-avenue field and particularly the Foster No. 1 well of the M. K. T. Oil Company, were puzzled Saturday upon learning that the gas being produced by the well has an unusually large gasoline content. The average gasoline content of the gas from this field is about one gallon per 1000 cubic feet of gas.

It is asserted that the gasoline from the Foster well was once reported being two gallons to the 1000 cubic feet and again reported as being 3.9 gallons per 1000 cubic feet. Coincident with these reports is the news that the gravity of the oil produced by the Foster well fluctuates from 27 to 29.9 deg. The average gravity of the Ventura-avenue field is 30 deg.

The Standard Gasoline Company, which has the contract for extracting the gasoline from the Foster No. 1 gas, has started to erect a boiler plant near the Foster well, to send the gas to its refinery in the hills to the east.

This plant is expected to be in operation within a few days. The Foster well is holding up well in its production, the daily flow being reported as about 1800 barrels of oil.

In light of the mysterious conditions created by the Foster well, geologists are reported to be debating whether the Foster well may not be on a structure separate from the Ventura-avenue field.

Score of Test Wells Drilling in Lea County

ARTESIA (N. M.) July 15. (Exclusive)—Twenty wildcat wells are going down in Lea county, where major companies are waging the most active drilling campaign in any section of the State. Acreage in southeastern Lea county has been bringing fancy prices in recent weeks and is largely being driven by Man-ger Jack Shank, who is making all possible speed. The broken ore taken from the area during the week.

The two new wells are to be drilled by Cranfill & Reynolds, two of the best field engineers in the Southwest. The locations are known as Wilson No. 1 on Section 23, 26-36 and State No. 1 on Sec. 22, 26-36.

The trend from the southeastern sector appears to be extending northward, and as producers on the Wilson No. 1 of the Gypsy Oil Company at the southwest corner of Sec. 34, 21-36.

This vein, which was manager F. W. Hoar, who was manager of the property twenty-two years ago, tells of the discovery then of a similar vein on the 1200-foot level, less than a mile from the sulphides ever known in the mine. Therefore all sulphides for smelting fluxes had to be brought from other sections, from Rhodes and California, with some ore from the Rhodes mine, beyond Miami. A couple of years later an ample ore supply was available for a new smelting plant, equipped for sulphides, with converters.

Down to 1200 feet, the ore is a free smelting oxide, or carbonate. The narrow seam of 1002 widened to even thirty feet, of ore of good smelting grade. Drifting on the new lead is slow, for a heavy flow of water has been struck, and the air temperature is up to 110 deg.

THE FIRST HOUSES
Workmen excavating near Lake Zurich have unearthed remains of lake dwellings which date back to the prehistoric period, more than 7000 years ago. Stone axes, spears and domestic utensils are among the objects found.

A combination of clay and wood was used in the construction of the lake huts, and the doors of the huts which were about 10 feet high were made of large slabs of stone bearing inscriptions of the Stone Age in hieroglyphs—(London Times).

PROGRAM OF MINE TO BE CARRIED ON

Head of United American
Reports Funds Obtained
for New Development

W. K. Rideour of Calman, Ariz., president of the United American Mining Company, who was in Los Angeles last week, made the statement that the company has been financed for carrying on an extensive and important campaign in the development of company holdings.

At present, he says, grading is under way for the foundations for the double-drum hoisting works soon to be installed while arrangements are being perfected for the extension of a high-tension power line to the collar of the working shaft, the plant to be electrified throughout.

It is planned, Mr. Rideour says, to shaft the Foster well to the 700-foot level, and to continue sinking to a depth of 1100 feet, from which horizon extensive lateral work will be performed for the purpose of prospecting and opening up, at profound depth, known ore bodies of commercial gold ore. One of the chief of these, he states, is the Tom Reed-Aspec, from which much of the high-grade gold ore has been mined in the past by the Tom Reed Company, and which has been opened up to within thirty feet of the United American west end line.

The holdings of the company, according to Mr. Rideour, are divided into three parallel veins: the Tom Reed-Aspec, the middle vein, and the south of the latter, now being designated as the Oatman Eastern vein. High-grade gold ore, it is asserted, was uncovered by the Tom Reed company a few months ago, as within seventy-five feet of the east end line of the United American, and geologists are reported to be debating whether the Foster well may not be on a structure separate from the Ventura-avenue field.

OATMAN MINING NEWS REPORTED

OATMAN (Ariz.) July 15. (Exclusive)—From Oatman has come report that the vein again has been picked up, after faulting from the drift on the 800-foot level workings from the new Black Eagle shaft. The drift is being pushed toward the American side and has about 400 feet to go before running under the Aspec workings. About twelve feet a day is being driven by Manager Jack Shank, who is making all possible speed. The broken ore taken from the area during the week.

The Walkover mine, eight miles east of Hackberry, in the Wright Creek section, has been leased by Hutchison, Kutner & Brooks, who will put in a fifty-ton amalgamation mill. Machinery is being furnished by the Kingman Engineering Equipment Company. Mr. Kutner is a metallurgist of long Alaskan experience.

At Cerbat, the Pasadena group, owned by George I. Taylor and C. Kate Mansfield, has been leased by the Robinsons and M. Taylor, who are driving a tunnel toward an intersection of veins indicated on the surface. The tunnel is about 100 feet entered, carrying values above \$50 in gold, silver and copper. This vein is to be followed to the extent of the property.

Edward C. Jacobs, president of the Black Dyke organization, has moved a complete camp to the claims from the Gold Chain property, and has contracted for sinking a 300-foot shaft. A power plant and hoist have been ordered and will be in position soon.

WILDCAT COSTS INCREASE

Texas Dry Hole Sunk to 8220 Feet With Many in California Below 7000-Foot Depth

Wildcat wells that are now being drilled in the Southwest afford some interesting side lights on the enormous cost of petroleum exploration work. Just now, near Santa Rita, Tex., an oil company is drilling a wildcat well at 8220 feet, having developed one oil sand at 3000 and another at 6300 feet. This well is going ahead. While California has no well quite so deep as this, the operators in this State have done their share in exploring the depths of the earth for petroleum.

According to the research bureau of the Chamber of Mines and Oil, there are five California fields with wells down below 7300 feet; three of these fields are producing oil from that depth. The deepest producer at Long Beach is 7500 feet. The Ventura field has a producer 7275 feet deep, with another hole as yet unproductive, down 7960 feet. The deepest hole in the Kettleman Hills is past 7200 feet, while Rosemead has produced from 7500 feet. Santa Fe Springs has a dry hole at 7200 feet. In the Brea-Olinda field a hole was drilled to a depth of 7292 feet.

CINNABAR MINE TO HAVE POWER

Line Completed to Estate of
Nevada Quicksilver

Company to Use New Rotary
Furnace Shortly

Seven Troughs Gold Pushing
Tunnel Project

LOVELOCK (Nev.) July 15. (Exclusive)—Electric power lines have been completed from the Packard station of the Nevada Valleys Power Company to the quicksilver mines of the Nevada Quicksilver Company, the Relief district, near Lovelock, and the new mine plant placed in operation. The management reports a large tonnage of excellent ore has been developed, and that the new rotary furnace will be placed in commission within six weeks.

Seven Troughs Gold Mines Company has added a powerful underground locomotive to its mine equipment, and is driving the long tunnel with a larger crew. The big lateral has been advanced 6000 feet, from daylight, and is expected to enter the Coalition one-zone within 1500 feet. A water flow of 250 gallons per minute is being controlled by culverts leading from the tunnel. The new vein recently encountered is reported to be developing well, with several inches of rich quartz showing.

A rich strike in the old Charleston Hill, at National, is claiming much interest. Polished, small seams of quartz miners doing assessment work opened a vein over four feet wide in virgin ground, with the ore said to sample \$100 to \$400 per ton. The ledge is believed to be a branch of the main National ore-zone, which produced over \$100,000 about twenty years ago. The owners have arranged for comprehensive work on the discovery, and numerous adjacent claims have been located.

H. E. Taylor and associates of Los Angeles are preparing to install a concentrating mill on the Republic Consolidated mine at Adelaide, south of Golconda. At a depth of 115 feet a three-foot vein sampling around \$40 per ton in silver and lead is said to be exposed, with values improving as work advances. The property was a noted yield of rich ores in pioneer days, but was never worked below the sixty-foot level.

WANT PARIS TO GLEAM

PARIS, July 15. (AP)—This "city of light" has never been lighted up again since the darkening during the World War. Montmartre residents complain. They want it made again the best-lighted city in the world.

Mortgage Security Corporation of America

One-Year First Lien Convertible 5½% Gold Notes
Series V-N. Y.

Dated July 1, 1932. Due July 1, 1933. Semi-annual interest January 1 and July 1, payable in New York, N. Y. Principal payable in New York. Coupon notes in denominations of \$1,000 registrable as to principal only. American Trust Co., New York, Trustee.

CONVERSION: Each \$1,000 Note will be exchangeable at the option of the holder on 30 days' notice or at maturity for \$1,000 par value of the Corporation's First Lien 5½% Gold Bonds, Series B-N. Y., due May 1, 1940, and \$300 in cash, accrued interest on each obligation to be adjusted in cash at the time of exchange.

The Mortgage Security Corporation of America, founded 1915, is one of the largest companies of its kind in the United States, and purchases first mortgages or their equivalent on owner-occupied real estate owned in fee, or on income producing properties. No loans are made on real estate devoted to any purpose use (other than residential) such as factories, clubs, theatres and farm properties, or on unimproved property or incomplete structures.

Loans have been made in over 300 cities located in 34 states. This gives numerical as well as geographical diversification to the security for the Company's notes. The average loan at present is less than \$7,000. Over eight thousand loans have been made of which less than 1/2 of 1% have been foreclosed, and these foreclosures have never resulted in a loss to the Company or to any investor.

SECURITY. The Notes are a direct obligation of the Mortgage Security Corporation of America and are secured by deposit with the Trustee of guaranteed or indemnified first mortgages upon improved real estate as herein described, or their equivalent, in no case exceeding 60% of the actual value of the property mortgaged, and/or Treasury Certificates, and/or cash, amounting to not less than 100% of the principal amount of all Notes of this issue outstanding.

PROVISIONS OF TRUST. The Trust Agreement under which these Notes are to be issued embodies restrictions which American and European experience has found advisable in the safe-guarding of this type of investment. It definitely limits the kind and character of mortgages which may be deposited as collateral for the issuance of these Notes and also the aggregate indebtedness of the Corporation. Among the restrictions and limitations are the following:

Each mortgage must be a valid first lien on improved real estate occupied as a dwelling by the owner, or on income-producing property.

OIL DRILL TO HUNT PLACERS

BAKERSFIELD, July 15. (Exclusive)—Immense values in gold will be revealed by drilling operations to locate ancient river beds beneath the lava capping in the pioneer mining districts of Northern California, according to Mark N. Alling of Bakersfield, who plans to use oil-well exploring methods to discover old river channels rich in nuggets.

He is a geologist and for the past three years has been engaged in Kern county oil fields operations. Before that he had wide experience in Alaska and in Northern California mining operations, and has recently written a geological report as to the Golden Bear mining property in Sierra county, and a proposal to explore it by use of chum drills.

The property is situated ten miles southeast of Downsville, recognized as one of the richest drifting regions in the State. All though one of the oldest mining districts in the State, with a reported gold production exceeding \$208,000,000, its development has been retarded by reason of its isolation. Mr. Alling asserts, "Ancient channel drift mines of this district have yielded gold at the average rate of from \$1,000,000 to \$2,000,000 to the mile, many deposits being much richer. The gravels breasted from these drift mines yielded on the average from \$2 to \$10 per ton in gold. The cost of mining ranged from 75 cents to \$2 per ton, \$1.25 per ton being a fair average," states his report.

"The Golden Bear channel," he states, "is believed to be the continuation of the famous White Bear channel. All modern ravines and gulches lying along the eroded path of this channel were mined by the pioneers."

STANDARD PLANS TO START OILDALE HOLE

OILDALE, July 15. (Exclusive)—The Standard Oil Company is preparing to start in its K. C. 5, on Sec. 18, 29-28, in the Kern River field. On the Kern front the Italo Petroleum Corporation is cleaning out its No. 14, on Sec. 16, 28-27, at a depth of 2888 feet.

Canton, China, has a new 4000-line automatic telephone system, installed by an American company.

This Clean Debt Record and Attractive Yield

combine to recommend these Bonds to conservative investors seeking diversification or larger yield.

An absolutely clean record for the prompt and full payment of all funded debts is enjoyed by the State of Rio Grande do Sul (Brazil) and all of its municipalities.

This State is equal in size to both New York and Pennsylvania. It leads all other Brazilian States in cattle and sheep raising and is one of the three largest in manufacturing, importing and exporting.

This issue of 6% External Gold Bonds is its direct obligation issued under conservative restrictions; sinking fund calculated to retire entire issue by maturity; drawn semi-annually in redemption at 100, beginning 1932.

94½ to yield from 6.40 to 7.53% depending on date redeemed. Details upon request. Phone, call, write.

Mcp Changes in Paris Forced by Traffic Growth

PARIS, July 13, (AP)—Traffic congestion and the rapid development of the Paris suburbs is creating a new Paris and at the same time giving the city's mapmakers considerable worry.

The official charts were revised in 1925 when the fortifications enclosing the city were raised. Last year it was necessary to renew the charts because of the opening of the Boulevard Haussmann and several minor streets. During the past twelve months more than 2000 buildings have been demolished and twelve streets abandoned or made way for the extensions of the Gare d'Est.

Now the traffic committee of the Municipal Council has decided that unless the famed Central Markets are transferred to the city limits at least 50 per cent of the adjoining streets will have to be widened. This will require the destruction of another 3000 buildings and will cost the city approximately 1,000,000 francs in expropriation fees alone.

SOLDIER OF FORTUNE CLAIMS LEE HIS KIN

ANCON (Caral Zone) July 13. (AP)—A feeble, white-haired American has just been admitted to the charity ward of the Gorgas Hospital, and the authorities are attempting to link together the weird facts of his adventurous life.

He is recorded as 102 years and he seems to have forgotten many important incidents which would furnish a clue to his identity. He is registered as William Lee, and claims to be a descendant of the Lee family in Virginia.

PANTHEON CROWDED

PARIS, July 13, (AP)—The population of the Pantheon, France's national temple for the ashes of her illustrious dead, is becoming congested and the Senate is facing the problem of what to do when there is no more room. Unless some of the old, honored residents of the famous sepulcher are moved out there will be no room for newcomers.

James Michelet, the historian, and Ernest Renan, who wrote the "Life of Christ," have just been consigned.

RADIO TELEPHONE UNITES SHIPPING

Short-Wave Invention Facilitates Their Communications

JUST as easily as a man in his office picks up the telephone and notifies his wife that he is about to come home for dinner, steamers and tugboats of William Wrigley's Wilmington Transportation Company fleet now are telephoning to each other and to their dock offices from wherever they may be at sea, as a result of the newest development in radio, the invention of R. D. Lemert, young local radio engineer.

Mr. Lemert, backed by the Wrigley interests, has been working for a year with a view to developing a seagoing, short-wave radio tele-

phone system. That he has been successful is evidenced by the fact that the three Catalina steamers and the eight tugboats of the fleet for several months have been using the telephones experimentally with complete success.

The apparatus consists of an ordinary desk telephone; a transmitter; a small cabinet about the size of a radio receiving set, and a loudspeaker. When the captain of a tugboat has finished taking a steamer to sea, for example, he picks up the telephone in the pilot house, lifts the receiver and says: "This is the tug so-and-so calling Catalina Terminal."

"I'm through taking out the Catalina," says the captain. "Where shall I go now?"

"Go over and bring in that tanker that's just coming around the light," orders the dock chief. And thus is saved a long trip back to the dock for orders; a trip back to the next job; and the intermediate waste of time and fuel.

Already much has been saved by the simple telephone system. Recently one of the tugs was taking ship to sea when the steamer's steering engine broke. The single tug could not hope to keep the ship from drifting around in the strong wind that prevailed. So the captain grabbed the phone and told the dock officials of his plight.

There was not a single tug idle at the dock but that didn't hinder matters. Successively three other tugs were telephoned in various parts of the harbor and in fifteen minutes all were alongside the tanker.

The drowned man lived at 1012 Gola street, Torrance. He was a machine and unmarred. The body was taken to the Wilmington Undertaking Parlor.

The interest of the owners of horses as well as of those new-fangled horseless vehicles also was protected in the ordinance which made it unlawful for any one to deposit or place on any street or alley any "nails, tacks, crockery, scrap iron, tin, wire, bottles, glass, thorns or any other articles liable to cause the tire of any wagon, carriage, bicycle, velocipede, automobile or any other vehicle to become punctured."

Pedestrians were looked after in the ordinance, which provided that every vehicle being driven in Los Angeles must have attached to it "a bell, gong or horn in good working order and sufficient to give warning of the approach of such machine or vehicle to pedestrians and to other vehicles and to persons entering or leaving street cars, and the bell, gong or horn shall not be sounded except when necessary to give warning."

Violations of the ordinance were punishable by a fine of from \$1 up to \$100, imprisonment in jail not exceeding fifty days, or both fine and imprisonment.

The Lancer

By Harry Carr

YOU will have to hand it to the Grand Duke Alexander of Russia.

He is a diplomat anyhow. He says that the young lady who asserts she is the late czar's daughter Anastasia is just a house for Anastasia's returned spirit.

This makes everybody happy. But to say the least, the spirit of the murdered little Grand Duchess didn't waste much time fooling around in the vasty deep before coming back to this mundane sphere.

From the present outlook the Republicans are never going to get a chance to get into the fight at all. The Democrats are going to chew each other up before Mr. Hoover comes to bail.

Incidentally, we can have an eternal farewell to Tammany Hall.

The order from the Democratic chiefs—that Tammany is to stay out of national politics—shows that the handwriting has appeared on the wall.

If everything else were in his favor, it isn't the stigma of New York politics would be fatal to Al Smith. The brand of the tiger.

Mussolini's blunder. Mussolini may be all right for the home talent; but as an empire leader he is the bunk. Tyrol is aflame with hatred and rebellion as a result of his stupidity. It is a mystery—just why it is that he is accomplishing anything by forbidding the simple Tyrolean peasants to put their own native language on the tombstones of their dead.

England may be whooping with joy but there is nothing for the American farmers to shout about in the discovery of huge tracts of rich agricultural lands in the middle of Africa.

You hear a great deal about land hunger, but the real trouble is that there is too much farm land now. The appetite cannot follow the speed of the plow.

This is what I call a grand adventure: Richard Halliburton, the young author of travel tales, taking a seventy-foot dive down in the mysterious sacrificial lake of the lost Mayan city—Chichen Itza.

Stirring the spirits of the beautiful virgin Indian girls cast into its dark depths for the edification of the Mayan gods.

Some of the best literature now being turned off printing presses comes from the pens of these young writers who are exploring the earth. Ten years ago when burning youth was writing sex novels, they were pretty darn silly; but as sympathetic spectators upon life, they are great.

Harry Hervey, Halliburton, Vincent Sheehan, Sheehan is the best war correspondent since Richard Harding Davis.

Possession of a ticket which called for transportation to his home at Salt Lake City saved George Kypouris, 19 years of age, from a jail sentence when he was convicted of selling two cases of beer before Municipal Judge Ballard. The court suspended a sixty-day jail sentence on the sale charge and a fine of \$100 for possession for a period of three years on condition that he leave for home immediately and live with his parents for that length of time.

The light in the Ship Cafe began, according to testimony before the grand jury, when Marco is said to have made an insulting remark about Mrs. Domestico Contorno, which was resented by D. C. Freeman, Santa Monica civil service commissioner, who was with the Contorno party. Marco is accused to have knocked Freeman down and to have begun shooting when Contorno ran to Freeman's aid.

Attorney Thomas P. White will defend the accused man, while Dep. Dist. Atty. Clarke will conduct the prosecution. The defense is expected in the selection of a jury, as the defense is known to believe that many persons may be prejudiced against the defendant because of his asserted underworld activities.

LINES AND SITUATIONS DIVERTING

"Mary's Other Husband"
Is Good Light Fare at the
Vine-Street Theater

BY EDWIN SCHALLERT
A wife with a scenario mind
invents plots and pretexts to impress
a wealthy uncle. In the process
she induces her husband to pose
as a butler, and she borrows a to-
tal stranger to enact the role of
her spouse. Whatsoever doesn't
happen as a result of this extreme-
ly complicated situation in "Mary's
Other Husband" eventuates because
of the instructions of a burglar,
the amorous inclinations of a house-
maid, and the loss of a baby—to
name but a few stray items in an
entertaining farce-comedy that is
being given at the Vine-street
Theater.

Edward Everett Horton has
returned to the type of play which
practically always pleases his audi-
ence. "Mary's Other Husband" is
a trivium of the theater, but it is
genuinely amuses. The situations
are well-contrived and the dialogue
bright.

Lois Wilson, Mitchell Harris,
Maude Fulton and other members
of the company are cast to ad-
vantage, with Mr. Harris and Miss
Fulton strikingly intensifying the
intrigue. Miss Wilson is the
wife addicted to plots, and plays
her role with marked spirit. Miss
Marvin and Fergus Reddie lend to
the general liveliness.

"Mary's Other Husband" is hardly
inspirational art to the mill of
the reviewer, but those who want
to spend a diverting evening will
find it wholly satisfying. Only the
close of the second act failed to
reach an appropriate peak last eve-
ning, and perhaps that can be im-
proved.

You will find this show excellent
light fare—especially suitable for
such warm weather as is now pre-
vailing.

BY PHILIP K. SCHUEKER
The "Racket," a motion picture
produced by Howard R. Hughes,
joined the procession of underworld
thrillers led on the stage by
"Broadway" and on the screen by
"Underworld," when it had its pre-
miere Saturday at the Metro-
politan. Adapted from Barrett
Crosby's stage play, it sets a dif-
ficult target for any other machine-
gun opus to shoot at.

The powerful and timely theme
of the picture overhangs all else. It
will come as a distinct shock to
many that the political machine in
any city constitutes such a dif-
ficult target for any other machine-
gun opus to shoot at.

TRI-HEADLINE BILL OFFERED

There's a triple headline bill
at the Hillstreet Theater this week!
A triple-header that includes
such names as Ken Howell's Col-
legians, Charles T. Aldrich and Gas-
ton and Andre, all of which
means you won't be disappointed if
the Hillstreet is on your theater
list for the week.

In case you have not seen How-
ell and his comrades on previous
bills let it be said that the young-
sters put on a snappy musical act
much after the fashion of those
popular melody makers, Waring's
Pennsylvanians. Although few in
number, the troupe presents excel-
lent entertainment... both
instrumental and vocal...
with some specialties of either va-
riety thrown in for good measure.

There's a trip through the world
on the wings of that once-popu-
lar songbird "The Red, Red Robin."
That scored especially well with
yesterday's audience... and a
banjo solo that ran it a close sec-
ond.

Charles T. Aldrich, presenting
his act "Proteus Surprises," proved
a genuine show-stopper. Aldrich ac-
complishes a really remarkable

feat by making complete changes
in costume, make-up and character
by simply walking behind a screen
which is, perhaps, six feet in length.
Not content to amuse the audience
in this manner, Aldrich goes one
better and present, as troupe of
train boards. If you doubt the
ability of an unattached whistler
... there's much to be
learned from this artist.

Gaston and Andre, famous Terp-
schorean artists with Lorna Jer-
maine and Edna Mackay, present
an interesting classical dance re-
vue. Gaston and Andre are in a
class of their own in the art of
adagio dancing. Many new and
breathtaking stunts are listed in
their repertoire.

Howard Kane and Corel Ellis in
"A Certain Young Man" is presented as
the feature screen attraction. As a
feature, the phantasmagoric young
British nobleman Novaro is un-
fortunately cast. Renee Adoree,
Marceline Day and Carmel Myers
appear in support.

BY MURIEL BARBOCK
The urbane, polished arch-villain
of the screen drama, Lowell Sher-
man, rolled nonchalantly onto the
Orpheum stage, and a ripple of ap-
plause ran through the audience.

Sherman, however, appreciatively
went immediately to his work as
the gentleman crook in the play-
let, "Lawful Larceny," a condensed
version of the drama of the same
name by Samuel Shipman, and the
feature, offering of the new Or-
pheum bill of the week.

There is no one quite like Sher-
man when it comes to playing
clever rogues, who with well-
mannered insouciance relieves oth-
ers of valuable possessions. In "Law-
ful Larceny" he has a part well-
suited to his capabilities, and one
in which, through his flair for light
comedy, he is ever a figure of sly
attractiveness.

He has capable support in Miss
Betty Franco and Ellen Robin-
son, who portray, respectively, the
woman scorned and the woman
loved. There were many old friends
of the Orpheum in the audience last
evening and the welcome accorded
the playlet proved a warm one.

Following on the bill are the
Miss Dora Maughan in "The Bad, Bad
Woman." Songs fitting generally
under the classification of "The
Bad, Bad Woman" are presented
with occasional assistance from
Walter Fehl, were cleverly humor-
ous, and without snap.

But, perhaps, the Lowell
Sherman offering, I liked the Five
Reelers. These youngsters from the
city, little fellow who couldn't have
been six, if that old, to the oldest,
a fresh-faced lad probably in his
any city countenances such a
was the contagious, youthful zest
which endowed their work that you
couldn't help but love.

Incidentally, they could
dance.

A rapid-moving, wise-cracking
travesty was "Money, Money."
Money, money, money, money, money,
Marguerite Keeler, and played
for the utmost in laughs. This pre-
sented a couple bowed down with
grief because of a rapidly mounting
income which could not be spent as
fast as it piled up, despite needs of
the most pressing.

Not just another "girls' orchestra,"
but a cleverly directed musical in-
trigue ensemble was the act. The
Bon Jons Girls, who played variations
on Sousa's "Stars and Stripes
Forever" with vim, vigor and
enthusiasm.

Some nice dancing came from Bee
and Ray Goman and assistants in
Dance Scandals, acrobatic and
tightrope work from Frank Vane
and Oreta, while Herbert Clifton
proved one of those individuals who
did female imitations. He had some
sorgous gowns.

DAY FEATURES MANY OPENINGS

Besides the Pilgrimage
Play, now a virtual institu-
tion in Southern California,
which begins its ninth season in
the Hollywood hills this
evening, and "Lilac Time," the
George Fitzmaurice produc-
tion opening at the Carthay
Circle, there will be several
changes on the current play-
bill.

"Women They Talk About,"
a Vitaphone picture, has its
premiere at Warner's Theater
this afternoon. "Powder My
Back," another film from the
same concern, goes into the
Tower.

Pantages has a new vaude-
ville show, with "Honor
Bound," a Fox film.

Collegiate Hit
Still Favorite
in Manhattan

The unusual summer popularity
of "Good News" at the Mayan is
unique. This collegiate musical
comedy is the only attraction ever
offered here at the height of the
New York run. Popular shows have
always been produced here when the
eastern units were on the wane or
the season after the metropolitan
run.

"Good News" comes early through
Sam Selwyn's prominence in New
York theatrical affairs. This enables
him to secure the finest attractions
without delay. "Good News" is now
in its third month here, and is still
a most popular musical comedy in
New York, Boston and Chicago.

loved. There were many old friends
of the Orpheum in the audience last
evening and the welcome accorded
the playlet proved a warm one.

Following on the bill are the
Miss Dora Maughan in "The Bad, Bad
Woman." Songs fitting generally
under the classification of "The
Bad, Bad Woman" are presented
with occasional assistance from
Walter Fehl, were cleverly humor-
ous, and without snap.

But, perhaps, the Lowell
Sherman offering, I liked the Five
Reelers. These youngsters from the
city, little fellow who couldn't have
been six, if that old, to the oldest,
a fresh-faced lad probably in his
any city countenances such a
was the contagious, youthful zest
which endowed their work that you
couldn't help but love.

Incidentally, they could
dance.

BY MURIEL BARBOCK
The urbane, polished arch-villain
of the screen drama, Lowell Sher-
man, rolled nonchalantly onto the
Orpheum stage, and a ripple of ap-
plause ran through the audience.

Sherman, however, appreciatively
went immediately to his work as
the gentleman crook in the play-
let, "Lawful Larceny," a condensed
version of the drama of the same
name by Samuel Shipman, and the
feature, offering of the new Or-
pheum bill of the week.

There is no one quite like Sher-
man when it comes to playing
clever rogues, who with well-
mannered insouciance relieves oth-
ers of valuable possessions. In "Law-
ful Larceny" he has a part well-
suited to his capabilities, and one
in which, through his flair for light
comedy, he is ever a figure of sly
attractiveness.

He has capable support in Miss
Betty Franco and Ellen Robin-
son, who portray, respectively, the
woman scorned and the woman
loved. There were many old friends
of the Orpheum in the audience last
evening and the welcome accorded
the playlet proved a warm one.

Following on the bill are the
Miss Dora Maughan in "The Bad, Bad
Woman." Songs fitting generally
under the classification of "The
Bad, Bad Woman" are presented
with occasional assistance from
Walter Fehl, were cleverly humor-
ous, and without snap.

But, perhaps, the Lowell
Sherman offering, I liked the Five
Reelers. These youngsters from the
city, little fellow who couldn't have
been six, if that old, to the oldest,
a fresh-faced lad probably in his
any city countenances such a
was the contagious, youthful zest
which endowed their work that you
couldn't help but love.

Incidentally, they could
dance.

Rockwell Field

**Decision on Annexation
Suit Clears Way for Start
of Ten-Room Building**

HUNTINGTON PARK, July 13.—The West Maywood district, which has voted twice favorable to an-

tion, is to have a new ten-room school building as a result of a decision which was handed down yesterday by Judge Walter Gates of Superior Court. In the election held in January, 1926, the voters decided by a large majority that they favored annexation to this city. A suit followed it, before Al-

leged the election notice was published in a paper which had not qualified as a legal publication. The suit was decided in favor of the plaintiff.

A second election was held in March, 1927, and was favorable to annexation. Suit was again brought, the plaintiff being L. E. Huff. The

Some time ago, a school bond election was held in this city, in which there was included funds for a new ten-room school building in

West Maywood. The election carried. Since then, the school authorities have been awaiting a decision of the court in the annexation matter. This having been rendered, the school officials will soon begin the erection of a new

Balboa Bank to Move in August

BALBOA, July 15.—W. H. Bow-

man, contractor, is rushing work as fast as possible on the new Bank of Balboa building at the corner of Central avenue and Washington street, so that the formal opening may take place on Saturday, August 11, with business moving over from the bank's present headquarters.

Dr. F. C. Ferry, president of the bank, stated today that plans were being made to move at that date, and a public reception is being arranged.

crete construction throughout, with of Mission style architecture, with a three-ply red-tile roof. It will be the finest business building in this city and one of the best small bank buildings in Southern California.

ANGELUS TEMPLE AT VAN NUYS MORTGAGED

VAN NUYS, July 15. — According to J. S. McPherson, local attorney, the Four-Square Gospel Lighthouse building here has been mortgaged for \$3200. McPherson,

who is no kin of Mrs. Almee Sample McPherson, but who is acting for the local congregation, in a statement refutes the inference by Mrs. Minnie Kennedy, mother of Mrs. Almee McPherson, that loans are being sought on Angelus Tem-

ple and branch properties of the church organization for personal benefit of Mrs. McPherson. Control of the Van Nuys edifice is in the hands of the local congregation, and is separately incorporated, McPherson states. He asserts the

church has been mortgaged to "a certain debt owing to banks here and to individuals, and in no way figures in the present controversy between Mrs. McPherson and Mrs. Kennedy.

BELLFLOWER. July 15.—Petitions have been circulated among property owners on and adjacent to the new streets placed in Bellflower during the past year, resulting in almost a unanimous signature. The order calls for the removal of the

AL PLAN SET

**Military Honors, with
Port Rosecrans**

Although but 23 years of age, he had a wide acquaintance among flyers and was regarded as one of

the best in the Air Service. He was commended by the Secretary of War and air service chief for carrying assistance to snow-bound communities in North Michigan.

He is survived by his parents, two brothers, Jerome and David I. of

the United States Navy, and a sister Caroline. He was a native of Texas. Friends are invited to the services.

B. A. Dyas Co.

All Day Saturdays!

Seventh at Olive

Two Stores to Serve You

Hollywood at Vine

A Mid-July Event—Mid-July Dresses

1.95 2.95

—a Dyas purchase of very new and very unusual dresses for Girls 2 to 12 Years

Value and style in every pretty frock—and hundreds of them! Sheer—dainty—color-fast—hand-done, many of them—just such clever little frocks as very particular girls like!

Lawns—Voiles—Prints—With Sleeves and Without!

Fresh as a summer's day—picked with all the care in the world that each style may present certain merits for certain types. For very little ladies—2 to 6—the choice little hand-done frocks at 1.95 will hurry away.

For older sisters 8 to 12 years—a wealth of new styles, girlish, yet hinting of grown-ups' fashion just enough to be popular.

MONDAY—BOTH STORES—DYAS CO.—FOURTH FLOOR

Genuine Crystal Chokers

—a Monday feature

5.95

Brilliant—sparkling—valuable! Direct from the Orient—in that particularly fine cut known as "32". They will surprise you with their brilliancy—and note also the very clear crystal—that is the way with oriental crystal! Enjoying pronounced vogue right now—they are promised even greater popularity for Fall—just a word to the value-wise.

DYAS CO.—STREET FLOOR

Turkish Bath Towels

—grouped for a July event at interesting savings

PRICES START AS LOW AS 25c

At this price you may purchase very good quality, heavy weight Turkish towels in that popular 20x40 inch size. Twisted thread with attractive colored borders. Just right for beach and every day use.

SIZE 22x45 INCHES 45c

Double thread construction—heavy weight—absorbent and full bleached. White or colored borders. Very much worth while at the low price quoted—special, of course.

EXTRA HEAVY TOWELS 69c

Those "great towels" that spell luxury in every thread—the kind the men of the family usually like best. Wide borders make them attractive—and the extra size 24x46 is another feature.

TOWELS—DE LUXE—AT 1.00

Size 27x50 inches—life-time quality—towel de luxe for one's most particular taste. Solid colors—in the soft pastel shades for bath-room color harmony. Excellent!

DYAS CO.—BOTH STORES—SECOND FLOOR

2000 Yards Summer Silks

—popular silks at the height of their season

1.95

All summer frocks are not yet made by any means—vacation time calls for many—'tis such a simple matter to fashion the very smartest dresses this year—and now, silks like these at pronounced savings.

California—the land of all-year silk popularity—and among these, many silks to carry well through Fall—surely this IS opportunity.

Printed crepes—Mallinson's printed voiles—drawn-check georgettes—washable flat crepes—fine satin crepes—what a galaxy! And lovely colors in each—as well as color-right prints.

DYAS CO.—BOTH STORES—SECOND FLOOR

Stoeffel's Imported Voile, 49c

When one says "Stoeffel's" to the woman who knows—one has said everything there is to say as to quality. When one adds that these are attractive plain shades suitable for lingerie—draperies—frocks—kiddies' dresses—one adds the final note of real value.

DYAS CO.—BOTH STORES—SECOND FLOOR

Mendel and Wheary Trunks

45⁰⁰—55⁰⁰—79⁵⁰

—prices that spell deep reductions

Vacation time—luggage time—Dyas value time—a happy combination for early Monday morning shopping! No need to comment on the well-known superiority of Mendel and Wheary Trunks—luggage aristocrats at reductions only the luggage-wise can appreciate.

Regular and Extra Sizes

Choice of ten color combinations—and color is important in luggage these days. Finest construction—rigidly tested—many features found only in these famous trunks—wardrobe style of course.

BOTH STORES—MONDAY—LOWER STREET FLOOR

YOUR BABY and MINE

By Myrtle Meyer Eldred

Mrs. Eldred will be glad to answer all questions pertaining to babies and children. A stamped and self-addressed envelope, forwarded to this office, will bring a personal reply.

PERPLEXING PROBLEMS FOR THIS YOUNG MOTHER

Very This Young Mother writes: My little baby girl will be 1 month old in December. Could you tell me when I should begin to wean her? She is a very weak baby and I do not know what the cause could be. I am 18 years of age and my husband is 16. Do you think we married too young?

Answer: I am wondering who married you.
